Ahmad, S. A. ed. and S. C. Abb ed., *Nonlinear Optics and Laser Spectroscopy*, Alpha Science International, Ltd (2001).

Arnold, W., "The Ratio between Delayed Light and Fluorescence Emitted by Chloroplasts," *Biophysical Journal*, **12**(7) (1972).

Auzel, François, "Upconversion and Anti-Stokes Processes with f and d Ions in Solids," *Chem. Rev.*, **104** (2004).

Baltramiejunas, R., *et al.*, "Two-Photon Absorption via Deep Local Levels as Virtual Intermediate States in Semiconductors," *Phys. Stat. Sol. B*, **151**, (2) (1980).

Belsky, A.N., *et al.*, "Fast Luminescence of Undoped PbWO₄ Crystal," *Chemical Physics Letters*, **243** (1995).

Belsky, A.N., *et al.*, "Influence of Stoichiometry on the Optical Properties of Lead Tungstate Crystals," *Chemical Physics Letters*, **277** (1997).

Braun, Edmund A., *Black Light Creates Fascinating Fluorescence*, Edmund A. Braun, publisher (1968).

Broda, H.P. and J.R. Pellam, "Phosphorescence of Atoms and Molecules of Solid Nitrogen at 4.2°K," *Physical Review*, **95** (3) (1954).

Cario, G., "Über Entstehung Wahrer Lichtabsorption und Scheinbare Koppelung von Quantensprüngen," *Zeit. für Phys.*, **10**, (1922).

Chandra, B.P. and Jeffrey I. Zink, "Mechanical Characteristics and Mechanism of the Triboluminescence of Fluorescent Molecular Crystals," *J. Chem Phys.* **73** (12) (1980).

Clayton, Roderick K., *Light and Living Matter, Volume 1: The Physical Part*, New York: McGraw-Hill Book Company, (1975). (basics)

Clayton, Roderick K., *Light and Living Matter, Volume 2: The Biological Part*, New York: McGraw-Hill Book Company, (1975). (basics)

Clegg, Robert M., "The History of FRET: From Conception through the labors of birth,"

[http://server2.phys.uniroma1.it/doc/giansanti/BIOFISICA/BIOFISICA_2_2011_2012/materials-bf2-2012/2.Introduction to fluorescence/Clegg history RET.pdf](http://server2.phys.uniroma1.it/doc/giansanti/BIOFISICA/BIOFISICA_2_2011_2012/materials-bf2-2012/2.Introduction%20to%20fluorescence/Clegg_history_RET.pdf)

Cockerill, D.J.A. CMS ECAL Group, Rutherford Appleton Lab, UK. ([web based – scintillation detector crystals at the LHC](#))

Denk, W., J. Strickler, and W. Webb, "Two-Photon Laser Scanning Fluorescence Microscopy," *Science* **248** (1990).

Denk, W. and K. Svoboda, "Photon Upmanship: Why Multiphoton Imaging Is More Than a Gimmick," *Neuron* **18** (3): 351–7 (1997).

Dexter, D.L., "A Theory of Sensitized Luminescence in Solids," *J. Chem. Phys.* **21** (5) (1953).

Dexter, D.L., C.C. Klick, and G.A. Russell, "Criterion for the Occurrence of Luminescence," *Physical Review*, **100** (2) (1955).

[Diaspro, Alberto, ed., *Confocal and Two-Photon Microscopy: Foundations, Applications, and Advances*, New York: Wiley-Liss, Inc., \(2002\).](#)

Franck, J. and G. Cario, "Über Sensibilisierte Fluoreszenz von Gasen", *Zeit. für Phys.*, **17**, 202, (1923).

Franken, P., A. Hill, C. Peters, and G. Weinreich, "Generation of Optical Harmonics," *Physical Review Letters* **7** (4) (1961).

di Francia, Giuliano Toraldo, *The Investigation of the Physical World*, (1977 English translation). ([philosophical and scientific arguments for the basis of meaning and interpretation of nearly all physics from the early Greeks to 1975 CE - photons, spontaneous emission, vacuum state, uncertainty concepts, time \(event/process reversibility in quantum mechanics and thermodynamics, ...more...\)](#))

Grasser, R., *et al.*, "Optical Properties of CaWO₄ and CaMo₄ Crystals in the 4 to 25 eV Region," *Phys. Stat. Sol. B*, **69** (1975).

[He, G.S. and S.H. Liu, *Physics of Nonlinear Optics*, World Scientific \(1999\).](#)

Kaiser, W. and C.G.B. Garrett, "Two-Photon Excitation in CaF₂:Eu²⁺," *Phys. Rev. Lett.* **7** (1961).

[Kittel, C., *Introduction to Solid State Physics*, 5th ed., New York: John Wiley & Sons, Inc. \(1976\).](#)

König, Karsten, Iris Riemann, Frank Stracke, and Ronan Le Harzic, "Nanoprocessing with Nanojoule Near-infrared Femtosecond Laser Pulses," *Medical Laser Application*, **20** (3) (2005).

Klasens, H.A., "On the Nature of Fluorescent Centers and Traps in Zinc Sulfide," *Journal of the Electrochemical Society*, **100** (2) (1953).

Koch, T.R., E. Gebert, and Jack M. Williams, "On the Alleged Existence of Partially Oxidized $\text{Mg}[\text{Pt}(\text{CN})_4\text{Cl}_{0.28}\cdot 7\text{H}_2\text{O}]$ and the Attempted Preparation of the Analogous Be^{2+} and Ba^{2+} Derivatives. A Caveat," *J. Am. Chem. Soc.*, **98** (13) (1976).

Kröger, F.A. and W. Hoogenstratten, "Decay and Quenching of Fluorescence in Willemite," *Physica*, **14**, (1948).

Kunz, George Frederick, *The Curious Lore of Precious Stones*, Philadelphia: Lippencott Co. (1913).

Harvey, E. Newton and Aurin M. Chase, "The Phosphorescence Microscope," *Rev. Sci. Instrum.* **13**, (1942).

Mcdougall, D.J., "Some Factors Influencing Fluorescence in Minerals," *American Mineralogist*, **37** (1952).

Masters Barry R. and Peter T.C. So, "Antecedents of Two-Photon Excitation Laser Scanning Microscopy," *Microscopy Research and Technique*, **63** (2004).

Masters Barry R. and Peter T.C. So, *Handbook of Biomedical Nonlinear Optical Microscopy*, Oxford University Press (2008).

Monguzzi, A., R. Tubino, and F. Meinardi, "Upconversion Delayed Fluorescence in Multicomponent Organic Systems: Role of Dexter Energy Transfer," *Physical Review B*, **77** (2008).

Moore, Walter J., *Seven Solid States*, New York: W.A. Benjamin, Inc., (1967).

Mürk, V., *et al.*, "A Study of Excitations in CaWO_4 and PbWO_4 Single Crystals," *Journal of Physics*, **9** (1997).

Nassau, Kurt, *The Physics and Chemistry of Color: The Fifteen Causes of Color*, New York: John Wiley & Sons, Inc., (1983).

Needham, George H., *The Practical Use of the Microscope*, Springfield, Il: Charles C. Thomas, (1977).

La Historia General de las Cosas de Nueva Espana by Bernardino de Sahagún, 1560 – 1564, Florentine Codex Vol. III f. 266; CM-RAH, f. 203v.

Papadopoulos, Manthos G., Andrzej Jerzy Sadlej, and Jerzy Leszczynski, *Non-linear Optical Properties of Matter: From Molecules to Condensed Phases*, Springer (2006).

Prizbram, Karl, *Irradiation Colours and Luminescence: a Contribution to Mineral Physics*, London: Pergamon Press Limited (1956).

Prowazek, S. von, "Über Fluoreszenz der Zellen", *Kleinwelt*, **6**, 30 and 37 (1914)

Robbins, Manuel, *The Collectors Book of Fluorescent Minerals*, New York: Van Nostrand Reinhold Company (1983).

Robbins, Manuel, *Fluorescence: Gems and Minerals Under Ultraviolet Light*, Phoenix: Geoscience Press, Inc. (1994).

Rossmann, George R., "Irradiated Fluorescent Minerals," *Journal of the Fluorescent Mineral Society*, **3** (1974).

Schneider, Stuart, *Collecting Fluorescent Minerals*, Atglen, Pa: Schiffer Publishing Ltd. (2004). (E-mail: Info@schifferbooks.com)

Schneider, Stuart, *The World of Fluorescent Minerals*, Atglen, Pa: Schiffer Publishing Ltd. (2006). (E-mail: Info@schifferbooks.com)

Singh-Rachford, Tanya N. and Felix N. Castellano, "Photon Upconversion Based on Sensitized Triplet-Triplet Annihilation," *Coordination Chemistry Reviews*, 254, Issues 21-22, (2010).

Sheppard, C. J. R., *et al*, "Optical Sensing, Imaging and Manipulation for Biological and Biomedical Applications," Held in Taipei, Taiwan on 26-27 July (2000) Proceedings.

Strehler, B.L and W. Arnold, "Light Production by Green Plants," *J Gen Physiol*, 34 (6): 809-820 (1951). ([discovery of delayed fluorescence](#))

Volod'ko, L.V., E.F. Titkov, and A.P. Zazhigin, "Nature of the Fluorescent State in Complex Uranyl Compounds," *Journal of Applied Spectroscopy*, **27** (3) (1976).

Walton, Alan J., "Triboluminescence," *Advances in Physics*, **26** (6) (1977).

Warren, T.S., *Minerals That Fluoresce with Minerallight® Lamps*, Ultra-Violet Products, Inc. (1969).

Warren, T.S., Gleason, S., Bostwick, R.C., Verbeek, E.R., *Ultraviolet Light and Fluorescent Minerals*, Thomas S. Warren, publisher (1995).

Wilson, C.M., *et al*, "Observation of the Dynamical Casimir Effect in a Superconducting Circuit," *Nature* **479**, 376-379 (2011).

Wojowicz, Andrzej J., "Scintillation Mechanism: The Significance of Variable Valence and Electron-Lattice Coupling in R.E.-Activated Scintillators," *Proc. Int. Conf. Inorganic Scintillators and Their Applications*, Dorenbos, P. and C.W.E. van Eijk, Eds., The Netherlands: Delft University Press, 95-102 (1995).

Wood, R.W., "The N-Rays," *Nature* **70**, 530-531 (1904).

Wood, R.W., "On the Emission of Polarized Light by Fluorescent Gases," *Phil. Mag.* **16** (1908).

Wood, Robert W., *Physical Optics*, 3rd ed., New York: The MacMillan Company, (1934).

Wu, Feng, *et al.*, "Two-Photon Absorption and Two-Photon Assisted Excited-State Absorption in CdSe_{0.3}S_{0.7} Quantum Dots," *J. Opt. A: Pure Appl. Opt.* **11** (2009).

Xu, Chris and Winfried Denk, "Two-Photon Optical Beam Induced Current Imaging through the Backside of Integrated Circuits," *Appl. Phys. Lett.* **71** (1997).

Zink, Jeffrey I., "Triboluminescence," *Accounts of Chemical Research*, **11** (4) (1978).
